Quick Start Guide - Assessing Wiki Assignments

Create a Graded Site; wiki, blog, journal or podcast.

Complete the grading information for the site.
When ready to assess the assignment, click the Assessment link in the site.

Overall statistics will be presented with a button to access the Grade Center. Individual statistics are displayed in a grid below the overall data.

Clicking the Grade Center button will Open a New Window with the Gradebook and keep the Campus Pack content open in another.
To Evaluate an Individual Participant, highlight the name in the list and click the Evaluate Participant button. Inline Grading is currently available with the latest connector to Blackboard.
