The Course Entry Point defines the area that is first visible when entering a course. By default, this is set to the Announcements area, however it can be changed to a different location in the course. In order for a course location to be defined as a Course Entry Point, it must first exist as a link in the Course Menu.

1. Enter the course in which the Course Entry Point is to be changed.

2. Expand the **Customization** menu of the **Control Panel** and click on **Style**.

![Control Panel]

3. Scroll down to section 4, **Select Course Entry Point**.

   4. **Select Course Entry Point**

   Select the first page users see when entering the Course from the list below.

   Entry Point: Announcements

4. Select a location using the drop-down menu. Only items displayed on the Course Menu will be available as a Course Entry Point.

5. When finished, click **Submit**.
